1. Member project group KCC

KCC project organized by HD and ARM, in order to map out how the care in the eight UMC's was controlled for both diseases. There have been approached several UMC's and we attempted to identify the process and procedures. The project stopped because of complexity, the information obtained

2. Member project group zorgstandaard

After KCC was stopped, we started again together with the VSOP the project, but with purpose to write the standard of care for Hirschsprung's Disease.
